*Thinking
Forward for
Beauty*

Message conveyed
through our palms

People's desire to "be beautiful" is
unchanging, regardless of the times.

We at Momotani Juntenkan have
dedicated efforts to pursue beauty and
bring happiness to as many people as
possible by sincerely listening to
people's concerns and wishes.

The story begins

“Your smile is
precious to me”

The history of Momotani Juntanken
dates back to this one single skin lotion
created by Masajiro Momotani
for his wife, who suffered from acne.

“We want to solve problems
for everyone”

The founder’s thoughts
and passion have been
handed down for more
than 130 years.

Beautiful skin
enriches
your mind.

Making the world
more beautiful.

Making people's
skin more
beautiful means

In pursuit of the meaning of "beauty," we are currently promoting research at a cellular level, beyond the boundaries of cosmetics.

We are committed to continuing to take on new challenges in order to deliver the ideal beauty that our customers seek by offering a wide variety of products and services.

History of
MOMOTANI
JUNTENKAN

History of

MOMOTANI JUNTENKAN

Masajiro Momotani, the founder of Momotani Juntanken, was born in a family that operated a pharmacy named "Masakiya," which had served the Kishu Tokugawa clan of the Kishu region (present-day Wakayama Prefecture) since the Genna Period (1615-1624). He engaged in drug development under the guidance of Dr. Jun Matsumoto and other authorities in medicine. At the age of 23, Masajiro became a disciple of Dr. Ikujiro Sakurai of Tokyo Imperial University (currently the University of Tokyo) and created "BIGANSUI Acne Lotion" by employing a Western medicine formula, a trailblazing effort in those days. This marked the starting point of Momotani Juntanken as a cosmetics manufacturer.

2018

Momotani Juntanken's products are displayed in the special exhibition "A Thousand Wonders of Japanese Technology" held in celebration of the 150th anniversary of the Meiji Period. (Products displayed are BIGANSUI Acne Lotion, a medicine for fever, MEISHOKU Cleansing Cream, and MEISHOKU Astringent Lotion.)

1993

Shifted to group management by newly establishing three companies depending on the type of distribution channels

1996

Seiichiro Momotani (current President) becomes Representative Director and President of Momotani Juntanken.

Okayama Factory is constructed.

2016

The headquarters is relocated to Chuo-ku from Minato-ku in Osaka. (A new head office building is constructed.)

2005

An aesthetic salon opens.

2007

Shanghai Momotani Juntanken Cosmetics Wholesale Trade Co., Ltd. is established.

1963

"Jeunesse Enzyme Lotion" (aquasi-drug), patented in France and Japan, is launched.

1964

The placenta-essence skin care product "Tarvena Cream" is launched with technological alliance with German pharmaceutical company H.C. Starck.

1976

Actress Sayuri Yoshinaga is used for advertising of the MEISHOKU Gold Series as its image model.

1962

As an exclusive agency in Japan, the Company concludes a technology/manufacturing tie-up with 4711, a world-renowned German company for Eau de Cologne.

1936

"MEISHOKU Astringent Lotion," featuring a buffer effect, is launched. (Later its process is granted a patent.)

1959

Actresses Kyoko Kagawa and Ruriko Asaoka are used for advertising for women's cosmetics. For men's cosmetics, baseball player Shigeo Nagashima, actor Yujiro Ishihara, and professional wrestler Rikidozan are used.

1953

Ito Kinuko, Miss Universe Japan and known as a beauty with a well-balanced figure, is used for the Company's advertising.

1932

Masayoshi Ohira (later Prime Minister of Japan) joins Momotani Juntanken.

1927

Masajiro Momotani is awarded the Legion d'Honneur by the French Government for his significant contribution to promoting the cosmetics industry.

1928

Masajiro Momotani is awarded the Medal with Green Ribbon and the Medal with Dark Blue Ribbon by the Japanese government for his contribution to the cosmetics industry and society at large.

1922

The Company's research laboratory, factory and sales office are relocated to Osaka, which serves as the headquarters.

1913

A cosmetics testing lab is established ahead of the development of the industry.

"BIGAN Soap" is released in alliance with UK-based Lever Brothers, Inc. (the predecessor to the current Unilever).

1914

The Company has the honor of supplying cosmetics products to the Japanese Imperial family.

1918

Suifu Kishimoto, one of Japan's most renowned Senryu (satirical haiku) poets, joins the Company's advertising department.

1902

"BIGANSUI Beauty Lotion" is launched.

"BIGANSUI Acne Lotion," created by Masajiro Momotani for his wife who suffered from acnes, is released.

1885

Momotani Juntanken is established in Kokawa (Wakayama Prefecture) by Masajiro Momotani.

MESSAGE & OUTLINE

Aiming to become a “Personal Beauty Consultant” that caters to the wishes of our customers

The “Juntan” in our name Momotani Juntanken means to follow the will of universe and render services to people.

With this term as his life principle, Masajiro Momotani founded Momotani Juntanken and set his principle as the corporate creed. Inheriting the spirit, we have since devoted our efforts to developing products far ahead of our time, aiming to eliminate people’s concerns.

Recent rapid advancement of IoT, AI and other information technologies and medical technologies has brought about significant changes to people’s lives, such as new values created beyond gender and racial differences and increasingly diversified ways of working and living. Against these background, changes have been taking place in the definition of “beauty” and people’s awareness of “beauty and health.” In today’s fast-changing world and in this age when people live to be 100 years old, people feel enriched by achieving healthy beauty, which gives them self-confidence and also becomes a priceless asset in their lives.

This is why we continue to pursue values that provide optimal solutions to each individual customer’s concerns from various perspectives, ranging from cosmetics to healthy food products, beauty salon treatments, and epochal medical care.

At the Momotani Juntanken Group, we will continue our efforts to evolve into a company that provides a total solution for “beauty and health” under the corporate philosophy: “We contribute to the well-being of people by helping them achieve a beautiful skin and thereby enriching their mind.”

Seiichiro Momotani

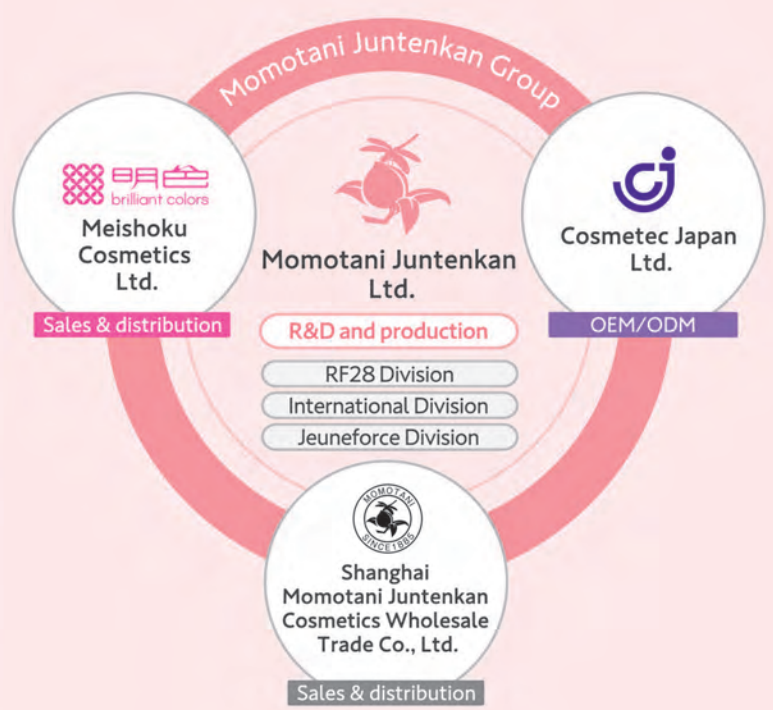

Representative Director and President

Momotani Juntanken Group

All for the beauty of our beloved customers

The Momotani Juntanken Group, consisting of four specialized companies, has engaged in unique business activities by sharing and integrating the knowledge and expertise that each group company has acquired. Momotani Juntanken Ltd. plays a central role in the Group by taking charge of R&D and production as well as management strategies for the Group as a whole. The company also has the RF28 Division responsible for e-commerce business, the International Division for global operations, and the Jeuneforce Division for sales at variety shops. Meishoku Cosmetics Ltd. sells MEISHOKU brand products through drug stores and mass retailers. Cosmetec Japan Ltd. provides customized OEM (original equipment manufacturing) and ODM (original design manufacturing) services for cosmetics, quasi-pharmaceutical products and healthy foods. In 2007, Shanghai Momotani Juntanken Cosmetics Wholesale Trade Co., Ltd. was founded to make inroads into the Chinese market, which is expected to expand further in the future.

02

RESEARCH &
DEVELOPMENT
&
QUALITY

Momotani Juntenkan's Research Capabilities

We strive to evolve
in order to bring smiles
to the faces of our customers.

In 1913, Momotani Juntenkan established a laboratory dedicated to the research of cosmetics, as a forerunner in the industry. Since then, we have devoted our efforts to advanced formulation development by repeatedly taking on challenges, successfully creating products that bring innovation to the Japanese cosmetics industry. Today, Momotani Juntenkan is striving to evolve into a new stage, beyond the formulation development of cosmetics, so that we can create new values in the realm of "beauty and health."

Our research covers all areas
related to beauty and health.

Taking creative approaches just like a start-up company

The scope of our research is not limited to cosmetics. We place great importance on flexibility and creativity, just like a start-up company. To improve our expertise in various fields and strengthen our R&D capabilities, we now have six research laboratories where collaboration with the same and different industries, academia and government has been promoted actively. We have also been working with front-line researchers to expand the range of our research, beyond the borders of cosmetics, to cover the development of new ingredients, research on bacterial flora, and medical research, with many patent applications being filed. We will continue to strive to shed light on the secrets of how the skin functions.

Offering best products by improving the capabilities of each individual researcher

The globalization of business requires a high level of research capability that can respond to a wide variety of needs in Japan and abroad. To meet the increasingly diversified needs, we are also working to further develop the capabilities of each individual researcher. The efforts include sending researchers to the world's leading events for personal care ingredients held around the world by the in-cosmetics group, where they can absorb information and knowledge useful for research and development. Increases in the knowledge of our researchers have led to remarkable improvements in the level of researchers' technical skills, and ultimately to the higher market value of our products in the Group as a whole.

Formula Meister system for R&D specialists

A "Formula Meister" is the highest professional qualification that researchers seek to achieve, and is awarded only to researchers engaging in formula development who have acquired a high level of skills and profound knowledge through various hands-on experiences, and who have passed a number of tests. Formula Meisters are empowered to authorize the commercialization of a newly developed product and are allowed to put their own original mark on the products that they themselves authorize. This system helps enhance the researchers' feeling of pride and sense of responsibility and fosters their motivation to work hard toward a lofty goal, which serves as a basis for handing down techniques and skills to the next generation.

“Quality capacity” of Momotani Juntenkan

Ensuring global standards to respond
to customers’ trust

“Reliable quality” is essential to products that are timelessly loved by customers. Okayama Factory, which acquired ISO 9001 certification (an international standard for quality management systems), has established a world-class quality control system, under which all the processes from the supply of raw materials to manufacturing and shipping are strictly inspected to ensure the safety and reliability of products. Our strong commitment to high quality of our products have been highly appreciated by our customers in Japan and abroad.

Our long history
itself is the evidence
of our “quality insurance”

Ever-evolving manufacturing system

Okayama Factory, in which a cell manufacturing system was introduced ahead of all others in the industry, has changed its production system flexibly to meet the needs of the times. The factory is currently promoting artificial intelligence (AI)-based productivity innovation. To respond to increasingly diversified needs, we are determined to constantly make progress at the individual level in our daily operations, without being satisfied with the status quo.

Constant efforts ensure the highest quality

With quality as the first priority, each individual at the manufacturing site complies with GMP (Good Manufacturing Practice), GQP (Good Quality Practice) and GVP (Good Vigilance Practice), to ensure quality that allows our customers to have confidence in our products. We are also conducting research on how to enhance the efficiency and speed of our manufacturing, ensuring that no products fail to meet the required standards. We are promoting manufacturing with a focus on both high efficiency and high quality.

Environmental-friendly factory

Okayama Factory is located on the bank of the Yoshii River, into which flows the clear water of Iwai Waterfall, certified by the Ministry of the Environment as one of the 100 best natural water sources in Japan. From the perspective of sustainability, we have launched a committee to promote environmental protection, under which the use of green materials has been encouraged and the conversion of recycled resources to fuel has been implemented. As part of efforts to reduce CO2 emissions, we have grown lavender using compost made from wastewater sludge.

**Meishoku
Cosmetics
Ltd.**

www.meishoku.co.jp

Skincare brand long loved by people of all ages

With age, people's concerns and needs change. We seek to become a strong brand that cultivate customers' loyalty throughout their lives. To this end, we offer a wide range of products, from those in fashion to longtime sellers whose formula has remained unchanged for more than 130 years. Based on over 100 years of experience in cosmetics research, we continue to create new products — ranging from skincare to makeup products — with primary importance placed on the "health of the skin."

Contributing to stronger emotional ties by offering products passed down through the generations, from grandmother to mother to daughter

In Meishoku Cosmetics, many products passed down from generation to generation as the secret to beautiful skin, such as "BIGANSUI Acne Lotion," a long-seller since the foundation of Momotani Juntenkan, "MEISHOKU Cleansing Cream" and "MEISHOKU Astringent Lotion." These still remain long-selling products due to their high efficacy spread by word of mouth. With feedback from our customers as a further impetus, we continue to offer products that will please our customers by creating innovation that reflects the times. The mission of Meishoku Cosmetics is to continue to deliver safe and reliable products with high efficacy to our customers, and through the products, we enrich their lives.

COSMETEC JAPAN

Cosmetec Japan Ltd.

www.cosmetecjapan.com

Innovative OEM/ODM that provides full support for “Beauty & Health” Business

Cosmetec Japan provides professional OEM/ODM services with full support—from planning to development, manufacturing, selling and handling of legal matters—to those planning to enter the “beauty and health” business. We make proposals to clients, taking full advantage of individual clients’ resources, such as their expertise, brand image and business style. We help clients realize limitless expansion of their business possibilities and develop new markets. As indicated in the slogan of “market creation-oriented OEM/ODM,” our strength is to propose plans, unrestrained by precedent and established ideas.

Reliable business network expanding worldwide

We provide products and services in all areas related to “beauty and health,” ranging from cosmetics (skin care, makeup, and hair care) to healthy foods. We enjoy a high reputation in Japan and abroad for our strong planning and proposal abilities, the quality of the products we create, and speedy product development, enabling us to expand reliable business networks worldwide, including in Europe, the U.S., China and Southeast Asia. As a total consulting company, we provide high-value global business services worldwide.

RF28 Div.

www.rf28.com

We “re-new” your skin every 28 days in harmony with your skin’s natural renewal cycle

RF28 is a skincare brand designed to “re-new” your skin on a 28-day cycle by adjusting the rhythm of skin rejuvenation. We have a broad lineup of high quality products that are comfortable for use, aiming to provide a healthy skin that is not influenced by age or circumstances, rather than creating a temporary effect to conceal your real age. To increase customer satisfaction, we sell skincare products mainly by e-commerce order, which enables us to achieve deeper communication with our customers. All our operations — from planning to customer service — are located on one floor, so that feedback from our customers is directly reflected in our products and services. We deliver healthy and radiant skin every 28 days, thereby bringing greater confidence to your mind.

RF28 Esthetic Salon

www.rf28.com/lab/

RF28 Esthetic Salon: a relaxation space pursuing sophisticated beauty, directly run by Cosmetic brand

To respond to diversified needs for beauty care which seeks beautiful, youthful and healthy skin, we created an esthetic salon within the headquarters of Momotani Juntenkan. RF28 Esthetic Salon provides an original menu, to each customer based on customer’s skin condition. The menu is combined with hand care by skilled therapists, high quality care item, and the latest beauty care equipment. Beauty care plans, ranging from facial care to body care, are tailored to each individual’s needs. We provide a quality relaxation space that brings customers closer to their ideal beauty and beyond.

Jeuneforce Division

www.e-cosmetics.co.jp/j/

Makeup helps you free yourself and find a new self

“Jeuneforce” is a combined French-English portmanteau that means “youthful force.” With “free yourself and find a new self” as its slogan, the Jeuneforce Division offers, at variety shops, beauty care products to help you “meet your new self.” The makeup brand “Ma Couler” reviews its product lineup every season to keep pace with the latest trend. To develop products on the cutting edge of new trends, young employees with greater sensitivity team up and promote development in a timely manner.

International Division

www.e-cosmetics.cn

Offers epochal skin care products and services beyond national borders

The International Division rolls out the products and services of three brands: “MEISHOKU Brilliant Colors,” “RF28,” and the global brand “MOMOTANI.” In addition to offering products, we at the International Division have recently launched smart business using IoT (Internet of things) in Asia. We are seeking to create new added value by providing smart device-based services. We are also making active efforts to provide multi-lingual services to propose new value worldwide. Other efforts include developing activities to raise public awareness of the importance of skin care in least developed countries.

TEAM
&
THOUGHT

SINCE 1885

Q

Is it true that employees, regardless of age or sex, can play an active role in your company?

Director (Cosmetec Japan Ltd.)

Answer

“ Became a director at the age of 32. ”
This is a company with a promotion system based on ability.

I'm originally from China, and later became a naturalized Japanese citizen. Nine years after I entered Momotani Juntenkan, I was appointed a director of Cosmetec Japan, despite my nationality in recognition of my contribution of conducting business negotiations globally and reaching several highly profitable deals. Momotani Juntenkan, free from such old practices as the seniority-based system, has established a corporate culture that allows young employees to freely express their views and ideas and enables truly able employees to play an active role in the workplace.

“ More than 30% of managers ”
are female.

You may sometimes think it would be nice if some useful thing existed. Such ideas often lead to the creation of new business opportunities. The key to a successful future is the sensibility of employees required to foresee the trend of the times. Age, sex and career are irrelevant. Most important thing for each individual is to keep a flexible and creative mind and focus on what we can do to make a deep impression on our customers. Every employee here is working with high motivation and a sense of pride in playing a role in building a brand that earns customer confidence.

Q

What kind of product are you currently developing?

Formula Meister (Makeup)

《 Answer 》

“ We are now creating a makeup product, ”
inspired by skincare concept
that produce beautiful skin.

We are now working on the development of a unique makeup product that makes users' skin more beautiful, taking full advantage of our expertise in skincare products. For the development of such a makeup item, we conducted our own market survey, and started by setting the research theme: “Whose, and what, problem will it solve?” Sometimes we work with raw material suppliers to develop new materials, or visit a factory to engage in manufacturing. We always take on new challenges to create innovative products. Direct involvement in research helps me acquire broader knowledge and skills, so I want to continue to be active in the front lines.

“ I'm as good as anyone else ”
when it comes to makeup products !

After being certified as a “Makeup Formula Meister,” I was deeply moved when I saw products stamped with my original mark at a store for the first time. I've already bookmarked several viral sites to monitor the word-of-mouth reputation of the products I worked for as Meister. Cosmetics are endlessly fascinating to me. My future goal is to expand the range of products I work on, including eye makeup products. I'd like to further hone my skills so I can create more high-quality products for customers.

Q

What kinds of efforts are you making to improve production technology and quality?

Vice Manager of Okayama Factory

《 Answer 》

“ Sometimes workers themselves are engaged in the development of manufacturing equipment. ”

We undergo a process of trial and error every day to ensure high quality and stable supply, and improve productivity. The number of workers required for the operation process from filling to packaging was reduced to two from more than 10 by introducing the cell production system, which enables high-mix low-volume production by a small work team. We need to consider manufacturing methods for each of more than 800 types of products. Sometimes the workers themselves are engaged in the development of manufacturing equipment. In my early days at the company, I developed small-size filling equipment.

“ People form the core of manufacturing ! ”

It is my mission to promote the evolution of manufacturing. A review meeting is held every month to eliminate unreasonable, uneven and wasteful operations and raise workers' awareness of the importance of improving the manufacturing process. As the vice factory manager, I need to keep an eye on the factory's production status. I pay special attention to the health condition and motivation of the employees. I say “Good morning!” to each staff member and check his/her facial expression and tone of voice. I believe that this is also a crucial factor in improving productivity to strengthen ties between workers and create a work environment that enables workers to feel a sense of fulfillment.

Q

What do you place importance on in promoting overseas business?

Global Planning and Sales Department

Answer

“ Creating a strong following overseas ! ”

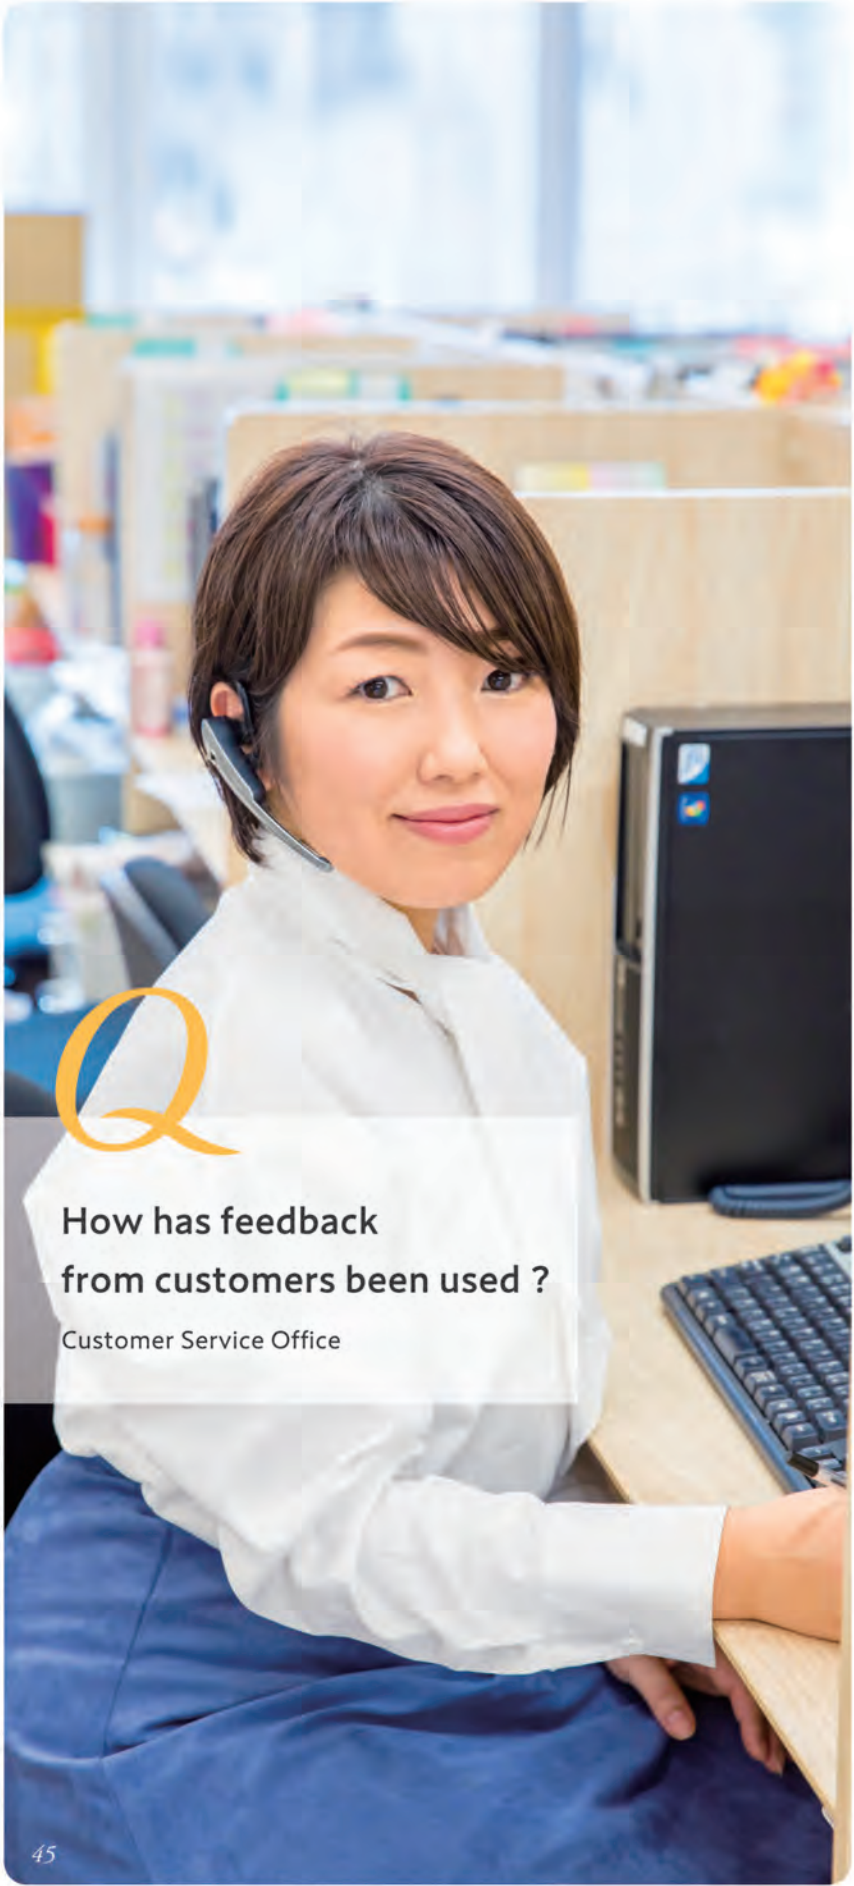

I'm responsible for the business of the MEISHOKU brand "MEISHOKU Brilliant Colors" and the global brand "MOMOTANI" in the Chinese region, mainly Hong Kong and Taiwan, and in the United States and Canada. In these regions, MEISHOKU cosmetics products have name recognition, but little is known about the relationship between these brands and Momotani Juntanken. My role is to let more people know about the company behind these brands, its history, its passion for and attitude toward "monozukuri" (or "creating something"), thereby enhancing consumers' confidence in our products. Our mission is to create a brand that is long loved by local people in foreign countries. I've devoted my energy to creating fans and gaining their loyalty, which have made our brands long-loved and cherished by local people.

“ When I do something, I want to fully enjoy it ! ”

Working in sales, in a way, means playing a role as a general director. Sales is a very creative job, which requires communication with many people and setting and achieving lofty goals by making all kinds of efforts. The tasks I have engaged in so far include implementing a media trip project to invite members of the media in Hong Kong to Japan, planning an art event featuring a popular beauty specialist, and preparing for a press kit for foreign media. My motto is: "When I do something, I want to fully enjoy it." I think approaching your task with this attitude is the key to enjoying your work.

Q

How has feedback from customers been used ?

Customer Service Office

《 Answer 》

“ Feedback from customers is our asset. ”

What is important in my work is to respond to inquiries from customers from their viewpoints. Customer feedback we receive by e-mail or phone is shared among all the staff members every day. We regularly hold meetings of representatives from the departments responsible for product development and manufacturing to examine how to use customer feedback to improve our products and services. Currently we are working to improve the Q&A page of our website to make it more visible and easier to navigate.

“ We provide solutions to customers' fundamental problems. ”

Momotani Juntanken has many loyal customers who have used our products for many years from generation to generation. “My grandmother advised me to use Momotani Juntanken’s products,” some customers say. To respond to such customer confidence, we are committed to solving fundamental problems that our customers suffer, not merely by answering their questions but also by understanding what made them ask such questions. All the staff members of the Customer Service Office hold first-class cosmetics certifications, enabling them to offer more appropriate advice to our customers. It’s very rewarding when we receive words of appreciation from our customers, such as “I’ll be a loyal user for all my life.” We are striving to improve our knowledge so that we can be of more help to our customers.

Q

What does it mean to Momotani Juntanken to “contribute to society” ?

Special Duty Department

Answer

“ The DNA passed down from the founder ”

Inheriting the spirit of the founder Momotani Masajiro, our predecessors contributed to society in various ways, leading to our receiving of the Medal with Green Ribbon and the Medal with Dark Blue Ribbon awards. In recent years, our CSR (corporate social responsibility) activities have included holding workplace tours and plant tours for elementary, junior and senior high school students, visiting schools to give lectures, and providing support to victims in disaster areas. In particular, we focus our efforts on the Pink Ribbon activities we started in 2005. As part of efforts to promote the movement, we created tools (Pink Ribbon hand cream, sheet protectors, etc.) to raise public awareness of the Pink Ribbon activities by involving willing employee participants in all stages from planning to completion, thereby enhancing the awareness of our employees as a whole. All proceeds from sales of the hand cream have been donated to the Pink Ribbon campaign. We also implemented a joint project with nearby universities.

“ The rate of breast cancer screening among our employees is 100% ”

To have employees working to promote the Pink Ribbon movement in particular recognize the importance of undergoing breast cancer screening, we prepared a program in the inaugural year of our activities that enables applicants to receive breast cancer screening while at work. All the female employees hoped to apply for the program, so we decided to provide breast cancer screening in our company from the following year. The rate of breast cancer screening among our female employees is 100%. Recently, we have established a system to pay all the breast cancer screening expenses for our employees' wives. To contribute to realizing a sustainable society, we are determined to further promote our CSR activities, including supporting the Pink Ribbon campaign, by actively addressing social and environmental challenges.

This little bottle represents the past and future of Momotani Juntenkan, which has passionately devoted itself to the pursuit of "beauty" for more than 130 years. We hope that when you take this company brochure, our passion and enthusiasm will be conveyed to you gradually through the palms of your hands, as in the case of our products.

Pursuing "beauty" diligently and energetically to satisfy our customers' needs

Our long history represents a strong bond with people, of which we are proud of.

We create a "new future."

Want to be researchers who can give you brighter hopes for your future

Continuing pursue for Beauty

Committed to offering top-quality products to you!

Want to be a company that can bring brand-new happiness in your life

More beautiful Than yesterday!

Message for the future
